Subject History Guidelines

Grade Point Average (GPA)

Grade points may be assigned for each grade awarded. A semester GPA is the average of all grade points attained in all subjects weighted by the credit points assigned to each subject in a given semester. A cumulative GPA refers to all grades averaged over the student's program.

Percentage Average (%AV)

A semester %AV is the average of all percentages attained in all subjects weighted by the credit points assigned to each subject in a given semester. A cumulative %AV refers to all percentages averaged over the student's programs. Percentages for all subjects were recorded commencing 1993 January semester. Students who commenced a program prior to that date will not have a cumulative percentage averaged calculated for that program.

Grading System

- a list of Discontinued Grades is available from Student Administration
